SEPTEMBER 2026

The Price Doubled. So I Called.

One of our staff needed car repairs. It cost more than she had, so she got help with the bill. The shop gave her a price that covered everything.

Then she went to pick up her car. The price had doubled. Doubled. She did not have it. The shop said she didn't understand the charges. She showed me the write-up. It was clear she understood exactly what was "supposed" to happen.

So I called and got really clear on what the shop told her. There was a problem. I explained we would take it to the Secretary of State and other regulators.

Suddenly they could see where the "misunderstanding" came from. The extra charges came off.

Yes, we give out food. We are also neighbors helping neighbors. *Tracey Patterson*

You Can Do Something

Here is a call to action. Get involved TODAY! Pick a cause, an organization, or individual and put some real muscle behind your efforts.

So many only see Perry Outreach Center as a food pantry. We are so much more. We offer classes to improve your quality of life, such as classes in computer training and classes in instrumental music. We offer health initiatives, nursing appointments and dental screenings.

Lastly, we offer job placement assistance. Build a resume and find new employment opportunities. Each of those initiatives requires people power. YOU!

Everything discussed in this note speaks to improvement in everyday life. Today our social-economic life is being challenged. Most are too docile regarding the political climate. You see the issues and do nothing. GET INVOLVED! You can't do everything, but you can do something. *Randall Mosley, Executive Director*
